

# We believe

in a harmonious life for the children of the world. We see all children who are affected by war, poverty and disease protected by a holy light. This light leads them on paths of peace, prosperity, and wholeness.

Our vision transforms any appearance to the contrary. It is stronger than lack and mightier than circumstance. The infinite power of Spirit is present within, healing all hurt, radiating love in the face of loss, and revealing a center of wholeness from which we emerge as a true community.

An environment of safety, support and spiritual nourishment is established through expected and unexpected sources. There is more than enough inspired leadership, insight, compassion and commitment to demonstrate this vision. We see the living Spirit of Grace made manifest now.
