

We believe

in the power of Life. It expresses itself in myriad ways and is sacred in all forms. Our unity and interdependence evidences itself as the diversity of life, intelligence, and substance. We seek to understand divine design. Immersed in the growing consciousness of our true nature, we align our desires, actions, systems, and vision with the principles of universal law.

Ideas of entitlement, domination, profiteering, exploitation, and hierarchy are now erased from human consciousness. We atone for the senseless neglect, misuse, and abuse of our mother earth and her majestic inhabitants. Ideas and ideals of collaboration, innovation, sacred awareness, and discernment replace old ways of being as we collectively establish dominion over obsolete, limited, and myopic perspectives.

As ambassadors of wisdom, we steward our earth and all of its living inhabitants. With spiritual integrity, we embody compassion acknowledging that animals are worthy of each dignity we seek for ourselves. From the core of the earth to the expanse of our atmosphere, polar regions to national parks, waterways to farmlands, marketplace to dining table, we consciously create a world that works for all. Harmony is our intention, wisdom our currency, discernment our path, integrity our foundation, and unity our inheritance.

We immerse our word in gratitude as we release it unto law.
